

DDSkills

Cutting-Edge Digital Skills for
Professional Care Givers of Persons with
Disabilities and Mental Health Problems

DDSkills Project is co-funded by the Erasmus+ Programme of the European Union. The main aim of the project is to develop training courses of digital skills for professional caregivers, so they can make better use of new technologies, and support persons with disabilities in the usage of such technologies.

WHY?

There is an increasing need to integrate existing skills, with new approaches and digital competences, able to properly meet new challenges.

DDSKILLS project, aims to develop an Alliance for developing a new and up to date training curriculum to respond to the needs of care service beneficiaries and properly take advantage of new opportunities offered by technologies.

What are the outputs?

 **A Multidisciplinary Curriculum** in the field of state-of-the-art technologies and their exploitation in the disability domain.

 **Digital Toolkits,** It will increase the volume of cooperation between higher education institutions and enterprises, to jointly develop innovative curricula and to support the development of innovative ICT-based training tools.

 **Certification Scheme,** It will contain principles and requirements for the certification of Training Materials and the DDSKILLS Curriculum.

 **Certified Professionals,** these professionals (in Greece, Italy, Ireland, and Lithuania) will promote the exchange of knowledge and reformation of the curriculum.
