

Dear team of Jaunuoliu dienos centras,

During the past year your work has proven to be more essential than ever before to offer young people hope regarding their future and encourage them to trust in their abilities to grow and progress in a period when our lives were put on hold overnight. The pandemic has affected all of us, but consequences suffered by young people have been the most severe as you know first-hand through your face-to-face and personalised services to them.

Besides the pandemic, our network has experienced sweet and sour changes: following the announcement that the UK will not take part in the new Erasmus+ programme (2021-2027), Eurodesk UK, a founding member of our network had to close its services. At the same time, we recently welcomed Georgia in our network. And still, throughout these ups and downs, Eurodesk Brussels Link has witnessed how resilient and inspiring is our network of over 1600 multipliers.

The Eurodesk Awards was set up to make sure that your efforts in reaching out to young people with different social backgrounds is recognised by the European institutions. By receiving high-quality projects through the Awards year after year, we have a stronger voice to showcase the creativity, competence and dedication that Multipliers put into their work in their quest of informing all young people about ways to experience the world and find their own path.

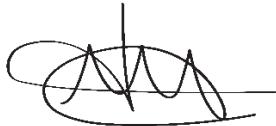

I would like to thank you for sending in your project to the Eurodesk Awards 2021 competition. Despite the huge challenges that you had to face this year, 38 projects from 14 countries competed for the prizes, and your project was the favourite within the Eurodesk Network and as such has received the 'Eurodesk Network Prize'. The jury panel has assessed each project carefully and I would like to forward their feedback about your project, Share the summer - Bingo!:

This project is clearly an inspiration for inclusive initiatives that give space to young people disadvantaged due to mental or physical disabilities to discover mobility opportunities. Despite being a challenge, these good practices need to be further promoted and connected with mobility for disadvantaged groups. It would be great to have more information about how the game worked.

Your contribution is greatly appreciated and it will be included in the Eurodesk Awards Project Catalogue 2021 for its potential to inspire other Multipliers. This publication forms the basis of EBL's communication about the work of Multipliers for a year at European level.

Thank you very much for your commitment as a Eurodesk Multiplier. We hope to see your next project in the upcoming edition of the Eurodesk Awards.

With warm regards,

Audrey Frith

Eurodesk Director
